

Enhance public safety with reliable power & connectivity.

## Edge Deployments for Law Enforcement.

Power and connectivity problems often stop the deployment of security tech like surveillance cameras and mobile Wi-Fi needed to protect citizens.

Gridless makes power and connectivity possible anytime, anywhere. The Gridless Sentry kit comes with a battery, modem, antenna, and PoE output, all in an easy-to-deploy case. It can be powered by solar panels for off-grid use or plugged into AC power.

### Why Go Gridless?

#### Tactical Battery Technology

Designed for the U.S. Military; easy install anytime, anywhere.

#### 10+ Year Battery Cycle Life

An infrastructure-grade kit that's engineered to endure 10+ years.

#### Cloud-based Connection

No NVR – Store and monitor your video footage remotely.

#### 24/7 Continuous Operation

Battery power keeps things running around the clock.

#### Next-gen Connectivity

Utilize 4G LTE or 5G cellular data plans or P2P Wi-Fi for comms.

#### Engineered in America

Proudly constructed in-house with American quality and craftsmanship.

Empower your force beyond the grid.
